💼 Professional Summary

Proactive and detail-oriented **DevOps Engineer** with over 4 years of experience in automating infrastructure, streamlining CI/CD pipelines, and optimizing cloud deployments. Skilled in Linux system administration, container orchestration, and infrastructure as code. Passionate about improving software delivery speed, scalability, and reliability through modern DevOps practices.

🧠 Technical Skills

Cloud Platforms: AWS (EC2, S3, Lambda, RDS, CloudWatch), Azure, DigitalOcean
CI/CD Tools: Jenkins, GitHub Actions, GitLab CI, CircleCI
Containerization: Docker, Kubernetes, Helm, EKS
Infrastructure as Code (IaC): Terraform, Ansible, CloudFormation
Monitoring & Logging: Prometheus, Grafana, ELK Stack
Version Control: Git, Bitbucket
Scripting & Languages: Bash, Python, YAML
Security & Networking: Nginx, SSL, Firewall, IAM, VPC, Load Balancer
OS & Tools: Linux (Ubuntu, CentOS), VS Code, Jira, Slack

🏢 Work Experience

DevOps Engineer
SkyOps Solutions Pvt. Ltd., Kathmandu | *Jan 2022 – Present*

- Designed and maintained **CI/CD pipelines** using Jenkins and GitHub Actions for multi-service applications.
- Managed **Kubernetes clusters (EKS)** and automated deployments via Helm charts.

- Implemented **Terraform scripts** to provision AWS infrastructure for development and production environments.
- Monitored system health and performance using **Prometheus + Grafana dashboards**.
- Automated daily backups and log rotation with Bash and cron jobs.
- Improved deployment time by **45%** and reduced cloud costs by **20%** through optimization.

System Administrator
CodeOrbit Technologies, Lalitpur | *Jul 2020 – Dec 2021*

- Configured and maintained Linux-based servers for hosting web applications.
- Managed Nginx reverse proxies, SSL certificates, and domain routing.
- Set up **Ansible playbooks** for automated configuration management.
- Assisted in migrating legacy systems to **Docker containers**.

🎓 Education

Bachelor of Science in Computer Engineering
Kathmandu University, Nepal | *2016 – 2020*

🧩 Projects

CloudFleet – AWS Automation Toolkit

- Built a Terraform-based toolkit for automating EC2, S3, and RDS setup with custom IAM roles.
- Integrated with Jenkins pipelines for zero-click deployment.

KubeMonitor – Cluster Observability Platform

- Deployed Prometheus and Grafana in Kubernetes for resource monitoring.
- Configured alerting for node health, latency, and disk usage thresholds.

CI/CD Pipeline Optimization

- Implemented parallel build and testing stages in Jenkins, reducing build time from 15 mins to 7 mins.
- Added automated Docker image versioning and push to AWS ECR.

🏆 Certifications

- **AWS Certified DevOps Engineer – Professional** (2023)
- **Docker and Kubernetes Mastery** – Udemy (2022)
- **Terraform Associate Certification** – HashiCorp (2021)

💬 Languages

- Nepali (Native)
- English (Fluent)
- Hindi (Conversational)

💡 Interests

Cloud automation, system optimization, open-source DevOps tools, and CI/CD innovation.
