🧠 Professional Summary

Analytical and results-driven **Data Scientist** with 3+ years of experience in data analysis, machine learning, and statistical modeling. Skilled at transforming raw data into actionable insights and deploying predictive systems using Python and cloud-based tools. Passionate about AI-driven decision-making and automation.

💼 Technical Skills

Programming: Python, R, SQL, Bash
Libraries: Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, Matplotlib, Seaborn
Machine Learning: Regression, Classification, Clustering, NLP, Time Series Forecasting
Data Engineering: Airflow, Spark, ETL Pipelines, APIs
Databases: PostgreSQL, MongoDB, MySQL
Visualization: Power BI, Tableau, Plotly
Tools & Cloud: Git, Docker, AWS (S3, EC2, Lambda), Google Colab, Jupyter

---

🏢 Work Experience

Data Scientist
Insight Analytics Pvt. Ltd., Kathmandu | *Jan 2023 – Present*

- Built and deployed machine learning models for sales forecasting and customer segmentation.
- Improved model accuracy by 25% through hyperparameter tuning and feature engineering.
- Automated daily data processing pipelines using Python and Airflow.

- Presented analytical dashboards to non-technical stakeholders using Power BI.

Data Analyst Intern
DataWorks Nepal, Lalitpur | *Aug 2021 – Dec 2022*

- Performed exploratory data analysis (EDA) using Pandas, Seaborn, and SQL.
- Designed ETL pipelines for processing and cleaning large-scale retail data.
- Supported senior data scientists in model evaluation and validation.

🎓 Education

Bachelor of Science in Computer Science and Information Technology (BSc CSIT)
Tribhuvan University, Nepal | *2018 – 2022*

📊 Projects

Predictify – Stock Price Prediction System

- Built an LSTM-based deep learning model for predicting stock prices using historical data.
- Used TensorFlow, Pandas, and Matplotlib for training, visualization, and evaluation.
- Deployed model as a REST API using Flask and Docker.

MediCare Insight – Health Data Analytics Dashboard

- Analyzed hospital datasets to identify disease trends and resource utilization.
- Built interactive Power BI dashboards for real-time insights.
- Implemented predictive analytics for patient readmission using Random Forest.

Resume Matcher AI

- Created a text similarity engine using cosine similarity and word embeddings (Word2Vec).
- Integrated NLP pipelines for tokenization, stopword removal, and TF-IDF vectorization.

🏆 Certifications

- **Data Science Professional Certificate** – IBM (2023)
- **Machine Learning** – Andrew Ng, Coursera (2022)
- **Deep Learning with TensorFlow** – Kaggle (2022)

💬 Languages

- Nepali (Native)
- English (Fluent)
- Hindi (Conversational)

💡 Interests

Machine learning research, data visualization, AI for social impact, and hackathons.
